

Students**Welfare****Administering Medication to Students**

Medications should be administered to school children at home, rather than at school, whenever possible. School personnel who are authorized to do so in writing by a building principal may administer medications to students under the procedures and conditions established to implement this policy that are developed with the assistance of a school nurse and adopted by the Board.

The registered school nurse, building principal or designee shall be responsible for overseeing the receipt of the written medication instructions and consents, the maintenance of complete and accurate medication administration records, the proper storage of medications, and the disposal of outdated and unused medications in accordance with District procedures. The building principal or his/her designee shall be responsible for ensuring that the written medication administration instructions that are on file in the District are periodically reviewed by a school nurse.

No school personnel, other than a health care professional shall be involuntarily required to administer any medication to a student by any means other than ingestion. Authorized school personnel who voluntarily agree to administer a prescription drug or nonprescription drug product that must be injected into a student, inhaled by a student, rectally administered to a student or administered into a nasogastric, gastrostomy or jejunostomy tube shall complete Department of Public Instruction approved training before administering medication to a student through such means.

Students may possess (carry) and use an inhaler or epinephrine auto-injector (e.g. Epipen®) with the written approval of the student's physician and parent or guardian.

No District policy or procedure shall be interpreted to limit or detract from the immunities and other limitations on liability available under the law to nurses and other persons who engage in or assist with the administration of medication to students.
