

Community Relations**Public Activities Involving Staff, Students and/or School Facilities****Use of Students in Solicitations**

The Board discourages the use of students in the distribution of non-school materials in the community and in the solicitation or collection of funds through public fund drives or other means.

All requests for groups or individuals to use students in the distribution of materials to people in the community will be referred to the office of the Superintendent to determine whether the requests comply with the overall purpose of the schools.

Students may engage in the raising of funds, under the control of the school, for certain approved student activities and for a limited number of public charities previously approved by the building principal.

The school shall not participate in non-approved fundraising campaigns.

Policy Approved: June 19, 1985

Policy Revised: September 23, 2013
